RS 255-500 - Stream Separator / Deserter

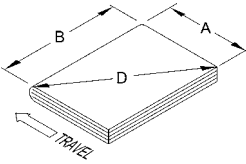

RIMA  **SYSTEM**

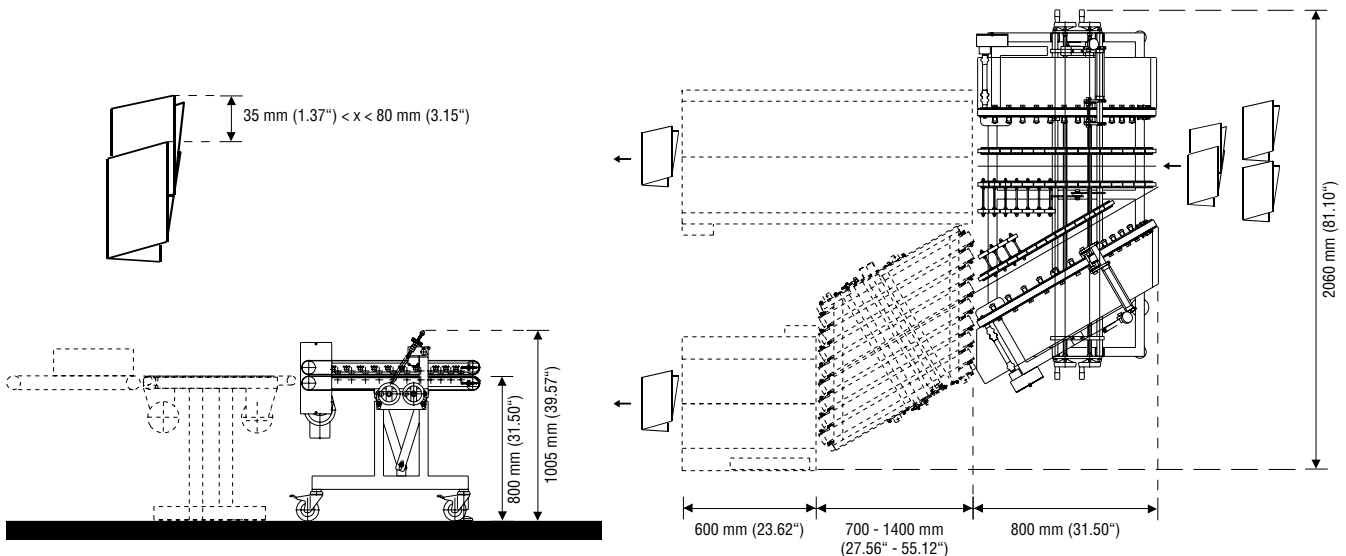

Requirements & Solutions

The RS 255-500 Stream Separator / Deserter separates a shingled stream of inserted products into two shingled streams and alternatively separates 2 parallel shingled streams. Format adjustments are easily made during operation. Features like independent conveyor speeds, spring loaded product guides and optimized product supports assure the safe and gentle splitting of the stream even at highest speed. The design of the stream separator, with only one diagonal conveyor, diverts only one shingled stream and standard productions, with non-inserted products, will run straight through the RS 255-500. Another advantage of the RS 255-500 is the customized length of the diagonal belt which can be adjusted to the specific needs of nearly any configuration.

Technical Data

Formats		Minimum	Maximum
	"A" Dimension	100 mm (3.94")	320 mm (12.60")
	"B" Dimension	150 mm (5.91")	485 mm (19.09")
	"D" Dimension	limited by "A" & "B"	limited by "A" & "B"
	Thickness	2 pages @ 80 gr/sqm	16 pages @ 80 gr/sqm
Infeed height		800 mm (31.50")	800 mm (31.50")
Delivery height		800 mm (31.50")	800 mm (31.50")
Lap between inserted copies		35 mm (1.37")	80 mm (3.15")
Speed	> 100.000 products per hour (product permitting)		
Input power	400 V, 3 Ph, N, 0.5 kW		
Weight	approx. 200 kg		
Options	variable length of the diagonal conveyor, bump plate for high speed		

Technical specifications available on request. The manufacturer reserves the right to change the technical specifications without prior notice (RS 255-500-E-04/04).
